---

Hello Felix,

Releasing from Hold - this app (1471900213 Stadia by Google) has been rejected by ERB for the following reason(s):

Reject - 4.2.7 - Needs to use open web or wrap individual games into their own game apps

Note: No Call Ticket or RC rejection needed at this time. Trystan, Ron, and Phil will have high level discussion with these devs

The app is back in your queue for processing. Reminder: apps released from hold need to be processed within 24 hours. Please note all apps escalated to the ERB should undergo a full review and include complete Internal notes (including BQC notes if applicable).

Please keep in mind that rulings can be case-by-case. Follow up with a Policy team member if you have any questions.

Thanks,  
Alexandria McEnroe
